Profit Margin by supplier

Business Insight:

1. Product & Supplier Performance

Smartphones, Monitors, and Laptops generate the highest revenue and profit margins.

Nova Electronics and FutureTek are the most profitable suppliers, while Digitex shows significantly lower margins.

Recommendation:

Focus on high-margin categories and optimize supplier strategy by renegotiating or replacing low-performing suppliers like Digitex

2. Customer Behavior

Customers aged 26–35 contribute the highest revenue.

Gold and Silver loyalty tiers drive consistent revenue, while Bronze customers represent high volume but lower value.

Recommendation:

Target 26–35 age group with personalized campaigns and improve Bronze-to-Silver conversion through loyalty programs.

3. Seasonal Trends

Revenue peaks during Q4 (Nov–Dec) and declines during April–July.

Product demand, especially for Smartphones and Tablets, increases significantly during the holiday season.

Recommendation:

Align marketing campaigns, inventory planning, and logistics with seasonal demand to maximize revenue.
